

Download Mitsubishi Hc7800d Manual

HC7800D. With the HC7800D home theatre projector from Mitsubishi Electric, big screen 3D movies have never looked better. Powered by newly developed 3D glasses with a high-speed liquid-crystal shutter system, the HC7800D delivers high quality 3D performance as well as excellent 2D reproduction from Blu-Ray and HD-TV sources. The downloadable version of the throw distance calculator is a special application to calculate projection distance and projection size for Mitsubishi Electric projectors. Mitsubishi Electric is dedicated to continuously improving the functionality and quality of its products, and may therefore occasionally introduce new models as evolutionary upgrades to an existing lineup. HC4900. The full high-definition HC4900 from Mitsubishi Electric, with its native 1080P high definition (1920 x 1080) resolution, 1000 ANSI lumens brightness and superb 7500:1 contrast ratio, sets all new standard in quality and affordability.
